

The 'EURO 46' from Castle

'The best panel in its market segment?

We think so.....

Do you?'

From the long established Castle EURO range of control panels, comes the creation of the EURO 46. The EURO 46 has been developed by listening to and working alongside installers and we believe that we have created the best panel in its market segment. We expect that both installers and end users alike will be delighted with its operation, features and capabilities.

The EURO 46 has been developed with installers in mind to ensure that in every Grade 2 and 3 installation, whether it be industrial, commercial or residential, will give you the peace of mind that your customer's property is protected and complies with all of the relevant standards.

The user friendly interface is designed for quick and easy programming and the features available minimise false alarms. In addition users can benefit from the intelligent setting features by being able to control their system with utmost simplicity and choice through setting the system by a proximity card, tag or pin code.

Further key features include:

The best installer take-over features

- End of Line or Double Pole wiring
- Selectable EOL resistor values
- Standard alarm cable (daisy chain or star wired)

Supplied with

- Contemporary remote LCD keypad

Engineer friendly features

- On-board and remote calibrated diagnostics
- Engineer friendly menu driven programming
- In-built proximity reader, 2 inputs and extension speaker/ PGM output within the keypad
- Integrated access / door entry control
- Available in small (250 x 297 x 82mm) and large (390 x 305 x 100mm) metal cases

Benefits for the users

- User friendly menu driven programming
- 6 Areas (or part sets)
- 75 User codes
- Up to 40 programmable outputs
- Intelligent Setting

Advance signalling and maintenance features

- Digi modem: Signals SMS, Contact ID, SIA & Fast Format protocols
- Full upload and download features including ARM® (Automated Remote Maintenance)
- ARM® service options allows automated service periods from 1 week to 1 year

Design and setting device options

- Optional satin chrome, chrome or brass flush mount keypad
- Optional internal and external proximity readers

Our objective in creating the EURO 46 was not only to create a panel that was the best in its market segment but to also offer a product that is competitively priced. Furthermore you can be assured that the EURO 46 has been tried and tested to the highest standard as it is based on the EURO Range platform which has been in the market place for over 10 years.

Are these the key ingredients to make it the best panel?
