## **New EUROminiPROX**

A new version of the popular EURO mini control panel is now available with prox. This new EUROminiPROX comes with a keypad which has an in-built tag (prox) reader and is sold as a kit complete with the mini end station (part number EUR-MINIP). The new prox feature is not available on the original EURO mini panels.

The EUROminiPROX, 10 input (zone), Grade 2x panel is the ideal solution for your customer's domestic and small commercial installations. A combination of up to 4 slim contemporary LCD keypads, either the standard (EUR-069) or prox reader versions (EUR-068), or the new internal prox reader (EUR-107) can be added to the system.
