

SMS COMMUNICATIONS

SMS Messaging to Mobile Telephones

SMS messages can be sent from your security system direct to your phone - providing vital information or just reassurance that all is well.

SMS Messaging

KNOWING THE CHILDREN ARE SAFE

When children return safely home from school, a discreet message on your mobile phone provides today's working parents with re-assurance that all is well.

CARING FOR A LOVED ONE

Despite the best of intentions, it is not always possible to be on hand if aged, infirm, or disabled relatives need help. Just knowing that someone will respond to their call for help can give tremendous peace of mind.

SECURITY ALERT

Whatever your security needs, your Security System can provide you with up-to-date information that you require. Connectivity between intruder alarm, access control, CCTV and 'hold-up' alarms re-inforces your security and safety.

PLANT & MACHINERY MONITORING

All forms of equipment and machinery in factories, offices, shops, garden centres and farms can be vital to the success of your business. How reassuring to know that a brief message on your mobile phone will alert you to a potential disaster.

SECOND HOME, CARAVAN, BOAT & PLANE

Whatever it is that you treasure in life, having clear messages before things go wrong can save a great deal of anxiety and, of course money.
